**Model with date/day/24-hour indicator**
Equipped with a date hand at the 3 o’clock position, a 24-hour hand at the 6 o’clock position, and a day hand at the 9 o’clock position.

---

**Adjusting the date**
Adjust the date indication on the first days of March, May, July, October and December.

• When the time on the watch is between 21:00 and 0:00, do not execute the adjustment. Otherwise the date indication may change improperly.

---

1 Pull the crown out to position I when the second hand points to 12:00 (0 second).

All the hands stop.

2 Rotate the crown to adjust the day. (only for models with a day indicator)
   • As the day hand moves in conjunction with the hour/minute hand, adjust the day first and then adjust the time.
   • The day hand can only be moved by rotating the crown clockwise. You cannot adjust the day hand independently.

3 Rotate the crown to adjust the time.
   • Pay attention the date hand to ensure AM or PM time is set properly.
   • For models with a 24-hour indicator, check the 24-hour hand to ensure AM or PM time is set properly.

4 Push the crown in to position 0 to finish the procedure.
   • The date indicator begins to change at about 22:30 and has finished changing by about 0:00.
   • The day indicator begins to change at about from 0:00 and has finished changing by about 5:00 (only for models with a day indicator).
   • Both hands can only be moved by rotating the crown clockwise.
