**Instruction Manual**

Thank you for your purchase of this Citizen watch.

Before using the watch, read the instruction manual carefully to ensure correct use.

After reading, be sure to store this manual in a safe place so it will be needed in the future.

Visit the Citizen website (http://www.citizenwatch-global.com/) to view visual guides for operation of your watch. Some models may be equipped with external features (calorimeters, etc.). Visual guides for operation of such external features can also be found on the website.

---

**Notes Before Use**

For optimal performance, follow these instructions carefully, to use in proper condition:

- Do not expose the watch to敲打 shocks or vigorous shaking.
- Avoid extremely high or low temperatures and humidity.
- Do not expose the watch to radioactivity or substances that contain magnetic fields (e.g., magnets, magnetic cards, etc.).
- Do not expose the watch to high pressure or water.
- Do not hit or drop your watch.
- Do not store your watch in high-pressure environments.
- Keep your watch away from hot, humid, or damp places.
- Avoid using your watch in locations with high levels of magnetic fields.
- Do not allow your watch to come into contact with any substances containing harmful chemicals (e.g., benzene, gasoline, etc.).
- Do not expose your watch to direct sunlight.
- Do not place your watch near objects that contain magnets or magnetic fields.
- Do not expose your watch to high temperatures or humidity.
- To avoid water damage, do not expose your watch to water.
- Avoid wearing your watch in areas with high levels of water or moisture.
- Avoid wearing your watch in areas with high levels of dust or dirt.

---

**Setting the Time**

When this watch becomes insufficiently charged, the following warning functions are activated indicating that the watch is insufficiently charged:

- **Time Setting Warning Function**
  - The time setting function is activated when the watch is insufficiently charged.
  - If the watch is insufficiently charged, the second hand moves back to 00 within 2 seconds.
  - If the watch is insufficiently charged, the second hand moves back to 00 within 2 seconds.

- **Overcharge Prevention Function**
  - Once the rechargeable battery becomes fully recharged, the overcharge prevention function is activated to prevent it from being charged further.

---

**Watch Accuracy**

The accuracy of your watch will be maintained when it is used at normal temperatures (5°C to 35°C), and worn roughly 12 hours per day. When used under conditions other than those indicated above, the accuracy of your watch may decrease slightly.

---
